

Looking Ahead at Future Opportunities

The MEPC hopes that today's workshop has proven valuable to your work, but we ultimately look at today as a beginning from which additional training and educational opportunities will be developed.

In order to better target future events toward the most pressing energy issues that impact your work, please discuss and record your group's answers to the following two questions:

1. How can the MEPC further assist you with energy tracking or energy management issues in the future? Do you have ideas for speakers, discussion topics, or events that you would like to suggest?
2. For what other topics should the MEPC offer workshops or training opportunities that would help you do your job?
